Throughout the years, I have taken an interest in a variety of computer languages. From my time in my undergraduate studies when I learned C++ and Visual Basic, to my self-taught years of learning HTML, CSS, and JavaScript during the "browser wars" years. This interest has continued to where it has helped me land a position at Promineo Tech, where I help develop out coding problems in Java, MySQL, and Spring Boot; review and assist in creating updated Spring Boot materials that are used throughout various community colleges. Additionally, I assist students in these same areas by serving as a coding mentor.

Outside of my work as a Spring Boot/ Java Curriculum Specialist, I am working on a few personal projects that are listed below in addition to a few freelance projects that are geared more towards the front-end side of things.

Check out what I know, what I am working on, and what I am trying to learn below

I'm currently working on ...

A Spring Boot and Thymeleaf project to collect customer information and store it into a MySQL database, along with statistics related to the submission

last commit **february** **Spring** **Thymeleaf** **Spring** **Spring Boot** **data** **MySQL** **data** **Hibernate**

Simplifirm - a client management system geared towards solo-practice attorneys that simplifies client management systems to the needs of a solo-practitioner. The backend portion of the project is built with Spring Boot and MySQL. The frontend is currently in development and will utilize Bootstrap and React to connect the frontend to the REST API.

frontend **Bootstrap** **frontend** **React** **Spring** **Spring Boot**

Personal Portfolio - Nothing more than Bootstrap, HTML, CSS, JavaScript, and a couple of simple libraries to showcase my projects to the world

frontend **Bootstrap**

Restaurant Website Rebuild - Taking on a website rebuild for a local restaurant. The main goal is to create a responsive design and to set up a connection to a third-party API for online ordering for carryout orders.

frontend **Bootstrap** **frontend** **React**

I'm currently learning ...

frontend **Bootstrap** **frontend** **React** **backend** **Node** **data** **MongoDB** **Data** **Python** **cloud** **AWS**

Ask me about ...

If you are a student in the Promineo Tech backend program, feel free to ask me any questions about your Java/MySQL/Spring Boot homework. If you are not a student and think that I might be able to help you, ask away!

How to reach me: ...

You can contact me by email, on [LinkedIn](#), or [Twitter](#). -->
